# ABOUT MURPHY & SONS FENCE CO., INC.

Murphy Fence Company Inc. is the areas largest local manufacturer and installer of wood, vinyl and aluminum fencing. Through the years we have earned an excellent reputation as fence specialists. Earning honors in sales and service as well as an A+ rating from the Better Business Bureau.

At Murphy Fence Company the key word is quality, both in our products and our professional installation. We offer a full line of fencing to meet your needs and our products are backed by modern recourses and exceptionally capable personnel. Information is available during our regular business hours but our display area is always open for your inspection. Our personal consultation service and price quotes are done at your home or our office at no cost to you.

## ABOUT OUR CEDAR FENCE PRODUCTS

All of our Cedar Fence is made from 100% Cedar and is constructed on the premises. We refuse to cut corners and use inferior pine or spruce back rails. We build all of our fence products with pride and back them with a workmanship guarantee.

## PRODUCT SPECS

Each section has an overall length of eight (8) feet. All of our styles are available in a variety of heights including but not limited to 3, 4, 5, and 6 foot heights. 3 and 4 foot heights are constructed with 2 cedar back rails. 5 and 6 foot heights have 3 cedar back rails for extra strength and durability. Above all, our fence sections are assembled with galvanized nails not substandard zinc coated nails or staples.

Our 4x4 posts are specially treated and come in a variety of post tops to match your custom fence style. Matching walk gates are available in 3-4 ft widths. Each gate is inverted V-braced for sturdiness and can be hinged from either side. Matching drive gates are also available in all heights. 2 gates with 5 or 6 foot widths provide openings of 10 or 12 foot widths to adapt to all driveways.

Murphy Fence Company will custom install your new fence or you may choose to install it yourself. In either case, your fence is designed to be installed one section at a time between posts to enhance the beauty of your fence from both sides.

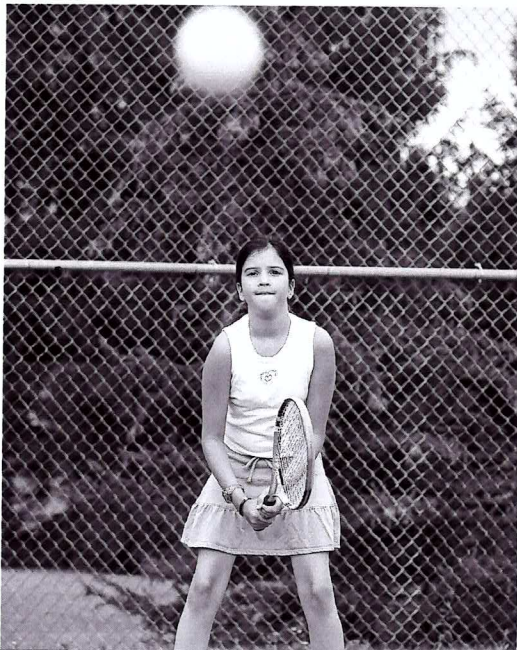

For the DIY'ers remember your posts must be installed at least 30 inches in the ground and secured with firmly tamped earth. 5 and 6 foot heights should always have added concrete around each post, this will ensure that each section of your fence be straight, sturdy and long lasting. A well made and installed fence will enhance the beauty of your home as well as offering protection and privacy.

## CHAIN LINK FENCE

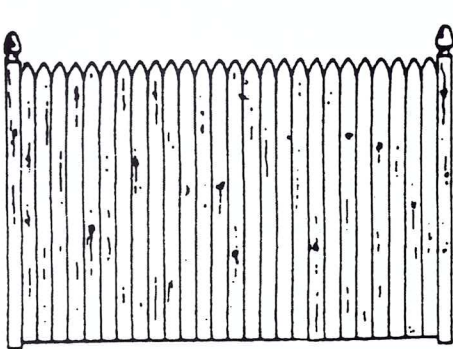

Safety, protection and privacy are yours with a new chain link fence. Small children and pets are safe within the confines of their own yard, away from the traffic of the street. A chain link fence protects your property from stray animals, trespassers and 'unwanted' guests, while providing privacy in a neighbourly way, but without that 'closed in' feeling.

Chain link fences are offered in galvanized and vinyl coated galvanized which are available in a variety of colors. Heights of 3 foot, 42 inches, 4 foot, 5 foot and 6 foot are available for residential use, but local codes will dictate existing restrictions in your community. Chain link fences pay for themselves in added privacy, protection and peace of mind, as well as countless years of little or no maintenance, which guarantees chain link to be one of the best investments you can make at your home.
